Education

Master of Science in Engineering Management

May 2026

University of Massachusetts Amherst

GPA : 3.9

Relevant Courses: Descriptive Analytics, Operations Management, Predictive Analytics, Prescriptive Analytics

Bachelors in Instrumentation and Control Engineering

Jul 2021

National Institute of Technology Tiruchirapalli

GPA : 7.91

Experience

Data & Analytics Consultant, Thorogood Associates – Bengaluru, India

July 2022 – July 2024

- Worked closely with the stakeholders of one of the top FMCG companies to create an end-to-end control intelligence platform used by controllers worldwide
- Took ownership of the development and maintenance of the RTR and MTD Streams; Planned and delegated tasks within an internal team of 4
- Collaborated with diverse client teams to establish project requirements, formulate logical frameworks, and devise comprehensive development strategies using Agile Methodology
- Developed, deployed and maintained control dashboards using the Azure Data Engineering Stack
- Conceived and implemented two pivotal internal automation solutions aimed at streamlining the monthly loading process, resulting in a remarkable 35% reduction in overall time expenditure

Graduate Engineering Trainee, Dr Lal PathLabs – New Delhi

Aug 2021 – July 2022

- Designed, implemented, and deployed an end-to-end automation product utilizing the .NET framework, resulting in a 15% reduction in global instrumentation downtime
- Managed the development and continuous maintenance of the Laboratory Information Management System (LIMS) platform in close collaboration with product vendors and the internal operations team
- Developed proof-of-concepts for data analytics models and KPIs to derive value from Log File Data using Python and PowerBI
- Engineered an innovative workflow automation solution for an instrument interface, achieving a remarkable 90% reduction in end-user person-hours previously required for manual task completion

Projects

- NLP Business data insight generation and visualization on participant information (SAE India), 2022
- Cortico-Muscular Coherence Analysis on Leg Movements, 2021
- Solar-powered washing machine for rural applications, 2021
- Suspension system modelling for an autonomous agricultural rover (SenseGrass Inc), 2018
- Control System development for a Automatic Car Parking System, 2018

Skills

- Technology Solutions: Azure Databricks, Data Factory, Data Lake, PowerBI, Tableau, Spark, GIT & Azure DevOps, Matlab, Solidworks, Fusion360, LangChain, LLM
- Tools and Languages: SQL, Scala, Python, C#, PowerBI, Tableau, MS Excel, R, .NET Framework
- Certifications:
 - Certificate Program in Business Analytics and Artificial Intelligence - Virginia Tech, India (Nov 2022)
 - MOOCs: Data Visualization with Tableau, Business Metrics for Data-Driven Companies
